TIMBER TILES

PARKER WOOD TILE

100% RECLAIMED

Worn down by the harsh conditions of the American west and her climate, the barns that once embodied this era have now been used to construct our Timber Tile collection. Each tile symbolizes a little piece of history, and can now be incorporated within any design or project. Our unique wooden tiles are not only filled with character and charm, but also embody a past which helped to shape the history of America.

Our Parker Timber Tile is constructed of several 2"x18" mosaic sheets that create a staggered pattern of thin rectangular tiles. Available in flat or dimensional style, our Parker Wood Tile is characterized by its singular dimension and uniform thickness. Ranging in depth from 1/2" to 3/4" thick, our Dimensional Style patterns are unique for the textural dimension that is part of every hand-made piece. Available in Natural, Buckskin, White, Ember, or Gunstock finishes.

| TILE SPECS: | |
|-----------------|---|
