TIMBER TILES

UNION WOOD TILE

100% RECLAIMED

Worn down by the harsh conditions of the American west and her climate, the barns that once embodied this era have now been used to construct our Timber Tile collection. Each tile symbolizes a little piece of history, and can now be incorporated within any design or project. Our unique wooden tiles are not only filled with character and charm, but also embody a past which helped to shape the history of America.

Our Union Timber Tile is made up of a mix of 4"x4" and 4"x8" tiles that fit to create a unique blocked pattern. Available in flat or dimensional style, our Union Wood Tile is characterized by its singular dimension and uniform thickness. Ranging in depth from 1/2" to 3/4" thick, our Dimensional Style patterns are unique for the textural dimension that is part of every hand-made piece. Available in Natural, Buckskin, White, Ember, or Gunstock finishes.
