

Natural Oil Prefinish

EUROCOLLECTION ANTIQUE OAK HIT-SKIP

CLASSIC CHARACTERISTICS WITH A REFINED TOUCH

The strength, durability, and availability of the massive Oak trees that populated the early American forests made it the go-to timber for barn and granary construction. EuroCollection Antique Oak Hit-Skip Wide Plank Flooring features characteristics only found in authentic reclaimed hardwoods and a unique, rich color exclusive to Reclaimed DesignWorks.

Meticulously curated from the reclaimed joists, rafters, granary boards, siding and floor boards of centuries-old agricultural structures, reclaimed EuroCollection Antique Oak Hit-Skip presents a reclaimed Oak experience that preserves much of the original rustic surface of textures while simultaneously revealing the beauty of raw virgin timber underneath.

DISTINCTIVE ATTRIBUTES

EuroCollection Antique Oak Hit-Skip contains a mixture of Red and White Oak and is characterized by a combination of original distressed surfaces and revealed smooth surfaces. It may also contain characteristics such as original nail holes, sound cracks, checking, and wormholes.
