

## SHOU SUGI BAN

# JONAN

### SHOU SUGI BAN – FEATURING ACCOYA WOOD

Jonan by Reclaimed DesignWorks features atlantic white cedar that is sustainably harvested along the coastal plain region of the United States and intended to provide a high performing, natural material with a weathered aesthetic. Jonan can be used for interior or exterior wall cladding and is available in a select tight knot grade.

Combining atlantic white cedar's impressive exterior reputation and RDW's design process, Jonan is durable, dimensionally stable, resistant to rot and insects, and has a grey, weathered look. Jonan can be treated to Class A Fire Rating for Interior Applications – please call to inquire. For exterior applications Reclaimed DesignWorks recommends sealing the face and back.

### DISTINCTIVE ATTRIBUTES

Reclaimed DesignWorks' designs offer a consistent aesthetic from the moment of installation. As a natural building material, wood cladding weathers inconsistently and can be unpredictable. Jonan provides an exterior material with minimal aesthetic variation.

JONAN SPECS:	
Shou Sugi Ban flooring is created using a Japanese wood burning technique to yield a unique texture and appearance.	
BOARD WIDTHS	5-1/8"
BOARD LENGTH	6'-16' random lengths
PLANK THICKNESS	Solid: 3/4"
FINISH OPTIONS	- standardly burnt and sealed on face only - available sealed face & back (recommended for exterior applications)

NOTE: Each of our products possess unique characteristics and beauty. While our samples provide a close representation of each specie, they are for photo reference only and cannot exactly match the end product.
