

SHOU SUGI BAN

NIGIRI

SHOU SUGI BAN – FEATURING ACCOYA WOOD

Nigiri from Reclaimed DesignWorks features accoya wood burnt in the Japanese style of shou sugi ban. Wabi Sabi can be used for interior or exterior wall cladding. Accoya wood is the result of decades of research and development that has brought together a long-established, extensively proven wood modification technique and leading-edge patented technology – acetylation to create a high performance wood, ideal for any application.

DISTINCTIVE ATTRIBUTES

By significantly enhancing the durability and dimensional stability of fast-growing and abundantly available certified wood species, Accoya wood provides compelling environmental advantages over slow-growing hardwoods (which are often unsustainably sourced), woods treated with toxic preservative chemicals, and non-renewable carbon-intensive materials such as plastics, steel and concrete.

NIGIRI SPECS:	
Shou Sugi Ban flooring is created using a Japanese wood burning technique to yield a unique texture and appearance.	
BOARD WIDTHS	5-1/2"
BOARD LENGTH	8'-16' random lengths
PLANK THICKNESS	Solid: 3/4"
FINISH OPTIONS	- standardly burnt and sealed on face only - available sealed face & back (recommended for exterior applications)

NOTE: Each of our products possess unique characteristics and beauty. While our samples provide a close representation of each species, they are for photo reference only and cannot exactly match the end product.
