

Prefinished Barn Siding

Prefinished White Barn Siding

Prefinished Red Barn Siding

Prefinished Charcoal Barn Siding

Prefinished Grey Barn Siding

PREFINISHED WHITE BARN SIDING:

For customers looking for a more consistent white finish, we offer pre finished white reclaimed barn wood. The texture of naturally faded authentic reclaimed barn wood with the uniformity of an evenly coated surface. Every board undergoes a custom water-based coating process that preserves its weathered character while adding consistency in color.

PREFINISHED GRAY BARN SIDING:

A popular color, our gray pre finished reclaimed barn wood siding will add depth and richness to any space in which it is used. If naturally weathered gray boards have too much variability for you, then our pre finished gray barn wood is the perfect fit. Every board undergoes a custom water-based coating process that preserves its weathered character while adding consistency in color.

PREFINISHED RED BARN SIDING:

Long ago farmers painted their barns with a mixture made from linseed oil, rust, and lime, which dried to a deep red color. As paint became more widely available, red became the barn color of choice as a fashionable homage to the past.

Continuing in this tradition, Prefinished Red Barn Wood Siding combines the deep textures and historic authenticity of naturally faded siding with the uniformity of an evenly coated surface. Every board undergoes a custom coating process that preserves its weathered character while adding consistency in color.

PREFINISHED CHARCOAL BARN SIDING:

Charcoal colored reclaimed barn wood is our newest addition to the pre finished color line-up and it has proven to be an employee and customer favorite. Very similar to the look of Shou Sugi Ban siding and shingles (charred or burnt siding) at a much better price. Every board undergoes a custom water-based coating process that preserves its weathered character while adding consistency in color.

BARN SIDING SPECS:

Hand-selected from weathered barns of the American Northeast, each board is individually inspected and graded to ensure durability, preservation and long life.
