

Prefinished White (Distressed)

Prefinished Red (Distressed)

Prefinished Charcoal (Distressed)

Prefinished Gray (Distressed)

## Prefinished Barn Siding (Distressed)

### PREFINISHED WHITE (DISTRESSED) BARN SIDING:

A white distressed surface can bring a fresh, crisp appearance to any project of your choosing. Our Prefinished White (Distressed) Barn Siding helps bring both the textural/historic quality of weathered barnwood together with the modern/rustic appearance of a distressed color.

### PREFINISHED RED (DISTRESSED) BARN SIDING:

History tells us that long ago farmers painted their barns with a unique mixture that yielded a deep red color when dry. As the years went on and paint became more readily available, red became a staple color for all barns as a way to honor past tradition. Our Prefinished Red (Distressed) Barn Siding helps bring together the natural tradition of red barn siding with the modern/rustic appearance of a distressed color.

### PREFINISHED CHARCOAL (DISTRESSED) BARN SIDING:

During the late 19th and 20th centuries, black barns began to enter the mix against a plethora of previous red barns. These black barns were used to promote a famous tobacco company, totaling to almost 20,000 during the height of this promotional program. Helping to continue this tradition in modern day, our Prefinished Charcoal (Distressed) Barn Siding helps combine both the textural/historic quality of weathered barnwood together with the modern/rustic appearance of a distressed color.

### PREFINISHED GRAY (DISTRESSED) BARN SIDING:

The unique texture of a distressed neutral gray provides a modern twist that will suit whatever project you are working on. Our Prefinished Gray (Distressed) Barn Siding helps combine the character and variety of weathered barn siding with the modern aspects of a distressed color.

#### BARN SIDING SPECS:
