

## SHOU SUGI BAN

# SADO

### SHOU SUGI BAN – FEATURING ACCOYA WOOD

Sado by Reclaimed DesignWorks features charred reclaimed hemlock burnt in the Japanese style of shou sugi ban. Sado can be used for interior wall cladding, ceiling cladding and millwork – call to discuss exterior. This is reclaimed wood and will have typical reclaimed character marks including checking and knots.

Sado is carefully charred, misted with water, cooled, brushed and then stained/sealed. The top coat sealer is applied prior to shipping. The burning process accentuates the wood grain and creates varying colors when viewed from different angles and in different light.

### DISTINCTIVE ATTRIBUTES

Our charring & sealing process makes for beautifully designed exterior wood siding. Like any exterior wood siding prefinished or finished in place, these materials will weather naturally over time and will require maintenance. For interior applications, expect little to no change.

#### SADO SPECS:

Shou Sugi Ban flooring is created using a Japanese wood burning technique to yield a unique texture and appearance.

BOARD WIDTHS	7"
BOARD LENGTH	4'-12' random lengths
PLANK THICKNESS	Solid: +/- 7/8"
FINISH OPTIONS	- standardly burnt and sealed on face only

NOTE: Each of our products possess unique characteristics and beauty. While our samples provide a close representation of each specie, they are for photo reference only and cannot exactly match the end product.
