

Weathered Brown Barn Siding

Our weathered brown reclaimed barn wood siding exhibits the timeless patina created by the aging process when barn wood is not directly exposed to the elements. These antique brown boards are sourced from the interior of salvaged structures in the eastern United States. More often than not, these structures are in excess of 100 years old. The color of our reclaimed brown barn wood siding ranges from tan to dark brown. The natural brown tones in this product show a slight variation and richness that can not be duplicated with new wood.

BARN SIDING SPECS:

Hand-selected from weathered barns of the American Northeast, each board is individually inspected and graded to ensure durability, preservation and long life.

BOARD WIDTHS	nominal 9"
BOARD LENGTHS	random lengths
